A Camera for Printing on Media Provided on Print Roll

Cross Reference to Related Application

The present application is a continuation of US Application Serial No. 09/113,057 filed on July 10, 1998, the entire contents of which are herein incorporated by reference.

The paragraph beginning at Page 1, line 15-25, to be amended as follows:

Summary of the Invention

It is an object of the present invention to provide for the production of interesting texture effects in photographed images produced by a handheld camera device.

In accordance with a first aspect of the present invention, there is provided a handheld camera arranged for housing a print roll for dispensing print media, the print roll comprising a chip having predetermined information stored thereon, said camera comprising:

a sensor adapted to sense an image;

a printer having a pagewidth printhead for printing images on the print media;

a processing system adapted to:

obtain the image from the sensor;

cause the image to be printed on the media in accordance with the predetermined information.~~a handheld camera for the output of an image sensed by the camera, with the camera including:~~

~~—— sensing means for sensing an image;~~

~~—— texture mapping means for adding texturing effects to the sensed image to produce a textured image; and~~

~~—— display means for displaying the textured image.~~
